

# OECD Experience with Subnational Fiscal Devolution

**Sean Dougherty**

Head of Secretariat, OECD Network on Fiscal Relations

Role of Parliamentary Scrutiny in the Reconstruction of Ukraine  
4 July 2024 (Virtual)

*Twitter* @econecho 

# Key points

- 1. Fiscal assignment principles***
- 2. Fiscal equalisation mechanics*
- 3. The Ukraine context*

# Key lessons from the Fiscal Network

## Based on the new Handbook and Synthesis:

1. *Better align sub-central spending with own-source revenue*
2. *Raise sub-central spending power & tax autonomy to reduce the need for earmarked grants*
3. *Strengthen fiscal equalisation systems*
4. *Delineate responsibilities and functions clearly*
5. *Improve transparency, data collection & performance monitoring to enhance co-ordination*

# SNGs play a key role in providing public services

OECD subnational governments (SNGs) share as % of general government

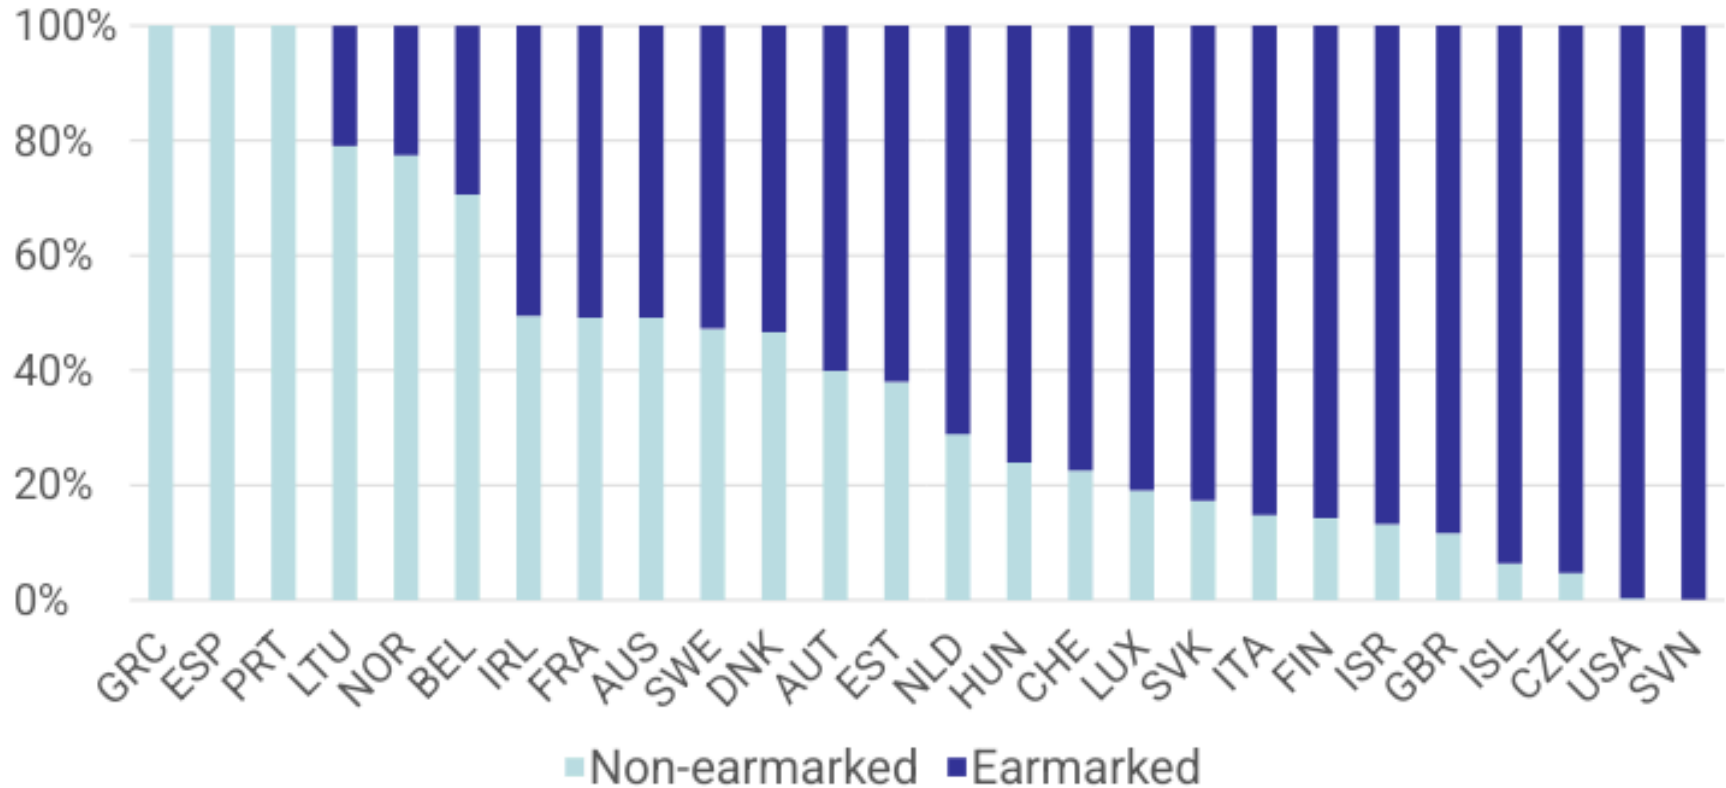

- SNGs are, on average (unweighted), responsible for:
  - o 50% of public investment,
  - o 31% of public expenditure
  - o 19% of government revenue,
  - o 15% of government debt and
  - o 15% of tax revenue
- There is substantial dispersion, and in some countries SNGs are liable for the bulk of these assignments

# Many governments earmark expenditures

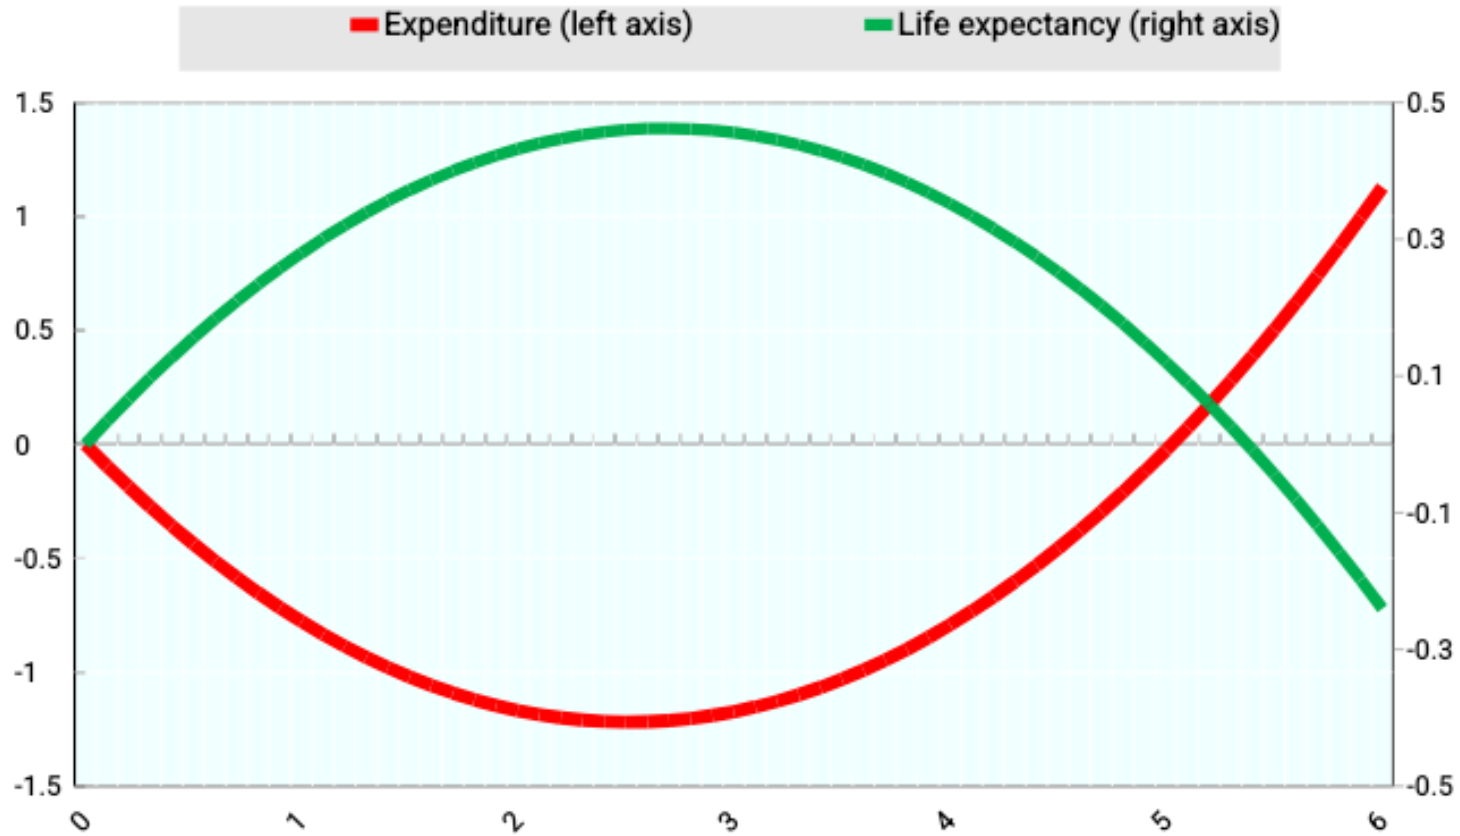

## Transfers paid/received by general government

% of total transfers

# Decentralisation can improve outcomes, only to a certain extent (e.g. healthcare)

*Better health outcomes are associated with moderate decentralisation*

Decentralisation index (0 = fully centralised; 6 = fully decentralised)

# Key points

1. *Fiscal assignment principles*
2. ***Fiscal equalisation mechanics***
3. *The Ukraine context*

# Highlights of past FE work

## **Key challenges identified:**

- Revenue equalisation may reduce tax effort and slow convergence
- Cost equalisation may be prone to rent seeking.
- Equalisation can pose a problem for budget stability.

## **Main policy messages:**

- Use core, difficult-to-manipulate measures to determine equalising transfers
- Representative Tax Systems (RTS) can mitigate perverse incentives
- Separate equalising transfers from other transfers
- Monitor impacts on inequality and other economic outcomes

# New equalisation findings

- The scale of equalisation varies considerably across countries.

Equalising transfers as a percentage of total government expenditure, selected countries

- In federal countries, the scale of equalisation is often related to fiscal autonomy.

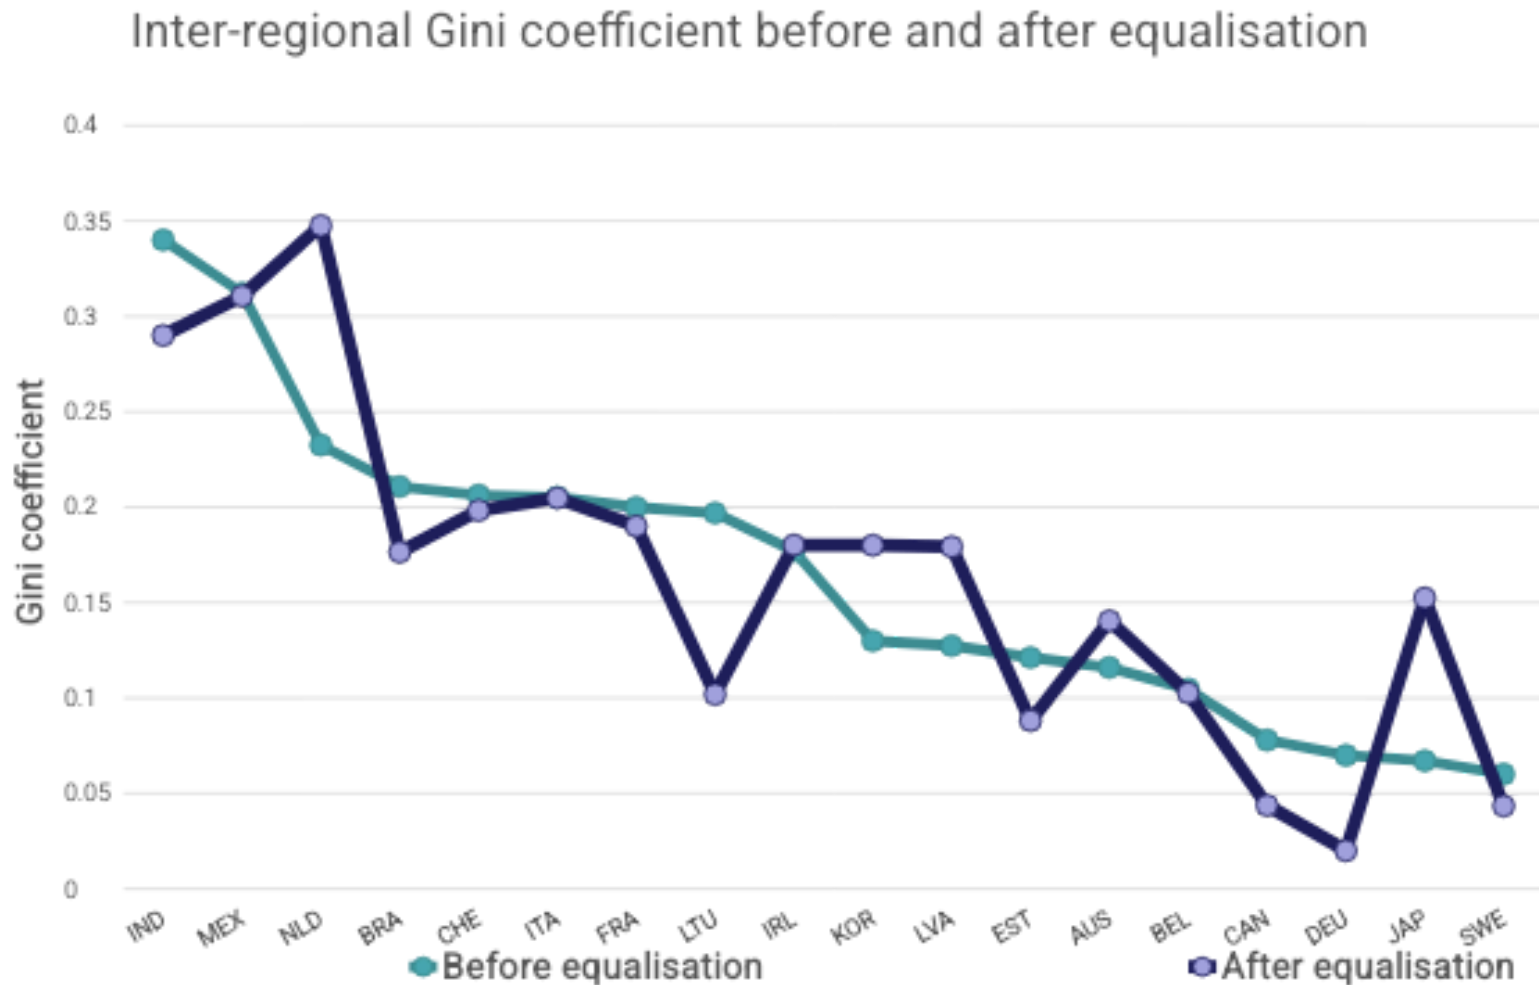

Equalising transfers and tax autonomy, selected federal countries

# Emerging equalisation challenges

- **Several emerging challenges were identified in this round of analysis:**
  - System complexity, policy neutrality and interaction with incentives
  - Balancing transparency and mechanism design
  - Which factors to equalise, including revenue base and revenues excluded
  - Scale and extent of equalisation
- **Some challenges apply to gap-filling systems in particular:**
  - Quantifying outcomes (e.g. revenue equality vs service provision)

# Equalisation does not always reduce revenue inequality, and can increase it

# Country approaches to equalisation

- **Several key mechanism design approaches have been identified to help equalisation policy be more neutral from the perspective of the SCG:**
  - Use of a representative tax system (e.g. Canada, Australia, Germany)
  - Use of standardized costs (e.g. Japan, Korea)
  - Incomplete equalisation (e.g. Germany, Lithuania, Estonia)
  - Separating equalising transfers from other transfers (e.g. Canada)
  - Arms-length commissions (e.g. India, Australia)
  - Linking equalisation to sub-national performance (Italy)

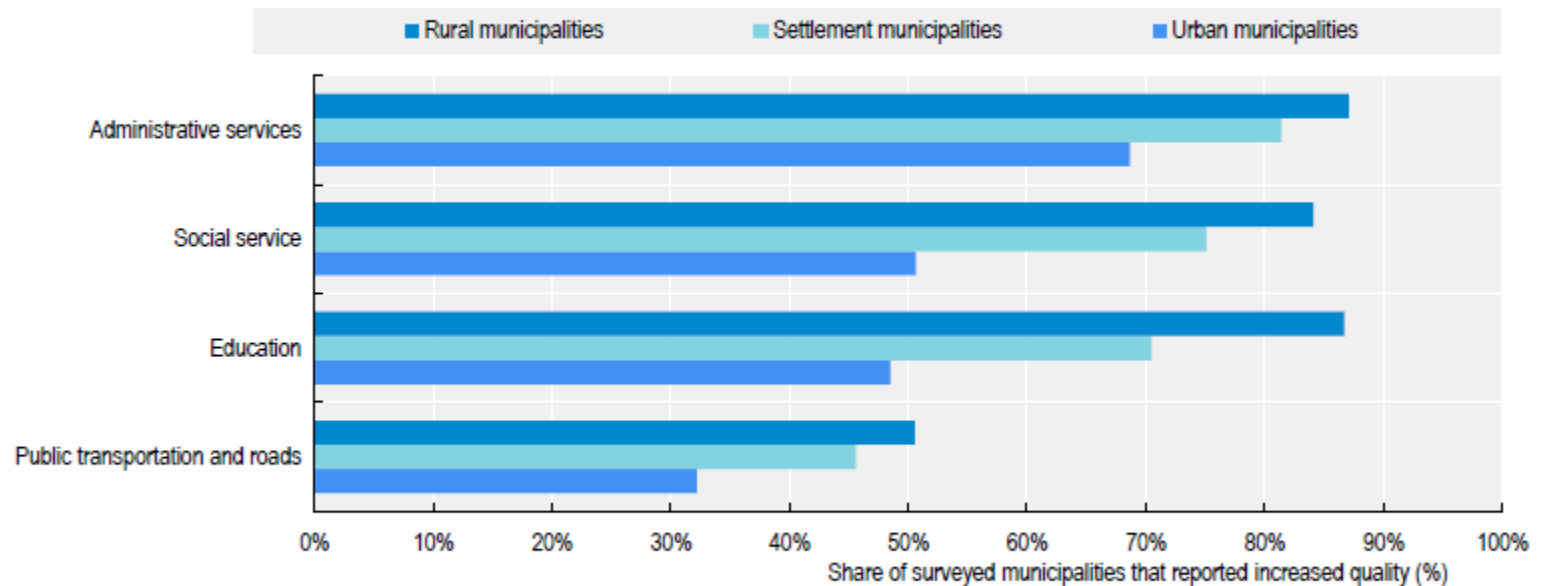

# Key points

1. *Fiscal assignment principles*
2. *Fiscal equalisation mechanics*
- 3. *The Ukraine context***

# Ukraine's decentralisation reforms have had positive effects already

## Positive effect of the decentralisation reforms on the quality of local service delivery

Note: The survey was filled out by 741 municipalities (51% of all Ukrainian municipalities in 2021).

Source: Author's elaboration, based on the OECD online survey.

# OECD Network on Fiscal Relations across Levels of Government

## Objectives:

- *Share experiences on all aspects of fiscal federalism and sub-national public finance, on both the revenue and spending sides of the budget*
- *Annual Network meetings, as well as workshops and expert seminars*
- *Unique policy analysis, database and reports*
